Fatal Overdoses and Fentanyl-Involved^ Overdose Deaths 2020-2022*

Number of deaths due to a medication and/or drug overdose of any intent, as well as the subset of overdoses which involved fentanyl^, by county
Limited to North Carolina Residents

For detailed case definitions see: <https://www.injuryfreenc.ncdhhs.gov/DataSurveillance/poisoning/SummaryTableforPoisoningDefinitions.pdf>

Data source: North Carolina State Center for Health Statistics, Vital Statistics Death Certificate Data (2020-2022*)

Analysis by: North Carolina Division of Public Health Injury and Violence Prevention Branch Epidemiology, Surveillance & Informatics Unit

^There is no individual code for fentanyl involvement on a death certificate; instead, the code T40.4 - an overdose involving an other synthetic narcotic is used as a proxy for fentanyl-involvement. Fentanyl gets coded using the 'other' synthetic narcotic code, but there may be other drugs

included in this category; however, we know from toxicology data that the majority of deaths receiving this code involved fentanyl.

*2022 data are provisional and subject to change
