Fatal Overdoses and Fentanyl-Involved^ Deaths Number of deaths due to a medication and/or drug overdose of any intent, as well as the subset of overdoses which involved fentanyl^, by county.

Limited to North Carolina Residents. For detailed case definitions see: <https://www.injuryreconciliationhhs.gov/DataSurveillance/poisoning/SummaryTableforPoisoningDefinitions.pdf>

Data source: North Carolina State Center for Health Statistics, Vital Statistics Death Certificate Data (2013-April 2025)

Analysis by: North Carolina Division of Public Health Injury and Violence Prevention Branch Epidemiology, Surveillance & Informatics Unit

*There is no individual code for fentanyl involvement on a death certificate; instead, the code T40.4 - an overdose involving another synthetic narcotic is used as a proxy for fentanyl involvement.

Fentanyl gets coded using the other synthetic narcotic code, but there may be other drugs included in this category; however, we know from toxicology data that the majority of deaths receiving this code involved fentanyl.
